Natural Resources

Natural Resources

- Integrated Natural Resource Management Plan (INRMP)
- The Plan supports the installation's commitment to sustaining a healthy environment, outlines conservation efforts, and will aid in ensuring compliance with applicable environmental laws and regulations

Natural Resources

- Goals included in the INRMP
  - Afforestation – establishment of a forest where forest cover has been absent for years.
  - Method of compliance for MD Forest Conservation Act
    - Construction over 40,000 sq ft is required to comply with above Act
  - Deer Herd Management
    - Over 200 deer on installation
    - Bow hunting
    - Trained Sharpshooter

Natural Resources

- Injured, Dying, or Dead Animals
  - If posing a threat call PMO at 37114
  - Otherwise call the Trouble Desk 32726

Natural Resources

- Invasive Species are a plants, animals or other organisms that are non-native to the area.
- Problem with invasive is the production of large quantities of seeds, some prevent growth of other plants and replace natives.
- Effects natural landscapes and wildlife.
- EO 13112 is the law & regulation governing control of invasive species.

Natural Resources

- Spreading invasive species through various methods. Some examples:
  - Moving watercrafts from waterbody to waterbody without removing invasive plants and animals
  - Carrying seeds of invasive plants on footwear or pet's fur;
  - Importing firewood and leaving in campgrounds
  - Driving and biking with invasive seeds in tire treads

Natural Resources

- National Pest Alert
  - Emerald Ash Borer

Natural Resources

Male Asian Longhorned Beetle

Female Asian Longhorned

Natural Resources

- Asian Longhorned Beetle
- The Asian Longhorned beetle (ALB) is an exotic pest threatening a wide variety of hardwood trees in North America. Adults are large (0.75 - 1.50 inches long) with very long black and white banded antennae. The body is glossy black with irregular white spots. The beetle was introduced into New York City, Chicago and New Jersey, and is a serious pest of hardwood trees. Adults can be seen from late spring to fall depending on the climate.
